Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Reissue Applications

This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

In the instant case, there is no record of assignment for this patent. The reel and frame numbers provided on the 3.73(b) are for U.S. Patent No. 5,967,445. Applicant will need to provide proper evidence of assignment.

Claims 1-3 are rejected under 35 U.S.C. 251 as being improperly broadened in a reissue application made and sworn to by the assignee and not the patentee. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

In the instant case, the applicant amended claim 1 of the original patent to recite “a cylindrical second rotary shaft having a cylindrical outer periphery and a cylindrical inner periphery, sheet material wound on said cylindrical outer periphery of said second rotary shaft”. In the remarks filed by the applicant on May 8, 2001, the applicant presented arguments as to the patentability of the claim by stating that the Satoh reference could not anticipate the claim because these limitations were not present in the Satoh reference. Thus, these limitations must be retained in any reissue claims.

The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. See 37 CFR 1.175(a)(1) and MPEP § 1414.

In the instant case, the deletion of the subject matter, as advanced above, is the identified error in the current declaration. Since the deletion of this subject matter is improper, a new different error will need to be identified and properly described in a supplemental declaration.

Further, the amendments to the claims do not comply with 37 CFR 1.173.

In the instant case, the amended claims must have changes made using underlining (for additions) and bracketing (for deletions); no “strike-throughs”.

A supplemental reissue oath/declaration will need to be filed with this application stating that all errors which are being corrected in the reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414.
